## SUMMARY

Software Developer building practical web applications with React, FastAPI, REST APIs, and SQL databases. Experienced in API integration, authentication, debugging, Agile delivery, and project documentation. Open to relocation.

## SKILLS

**Languages:** Python, Java, JavaScript, C, PHP, SQL
**Frontend:** HTML5, CSS3, React.js, Flutter
**Backend & Databases:** FastAPI, REST APIs, MySQL, SQLite
**Tools & Concepts:** Git, Docker, Bash, GitHub, Linux, Agile, SDLC, OOP, Data Structures & Algorithms

## EDUCATION

**Vimal Jyothi Engineering College** *Kannur, Kerala*
B.Tech in Computer Science and Engineering | May 2026 | CGPA: 8.49/10 | First Class with Distinction
No backlogs; no repeat year or gap in studies.
*Leadership and Communication:* School House Captain; President, Debate and Public Speaking Club; 3rd place, School Orator of the Year (50+ participants).

## EXPERIENCE

**Wheeltrix** *Remote*
*Full-stack Web Development Intern* *Jul 2025 – Sep 2025*

- Built core modules for a feedback collection system, including customizable forms, real-time submissions, and an admin analytics dashboard, contributing across 3 sprint cycles in a 4-person team.
- Owned API integration between 2 frontend modules and the backend, resolving 4 data-flow issues that had blocked QA progress for 3 days.

## PROJECTS

**A Multi-Layer Secure File Protection Framework** | Github | Research Paper
*Python, AES-256, scikit-learn, IPFS, Tkinter*

- Led a 4-person team in building a desktop file security system combining AES-256 encryption, LSB steganography, and decentralized IPFS storage over a 6-month Agile cycle.
- Developed keystroke dynamics authentication using Isolation Forest and One-Class SVM, reducing unauthorized access success by over 95% in 112+ simulated attack tests.
- First-authored a Scopus-indexed paper on architecture, integrity verification, and IPFS storage; published in ACT 2026.

**AI-Powered Campus Navigation System** | Github
*FastAPI, Gemini API, LangChain, RAG, ChromaDB, MySQL*

- Built a RAG-based campus assistant for location and department queries, handling the retrieval pipeline from ChromaDB vector indexing to Gemini API response generation.
- Improved answer accuracy by 90% against the initial evaluation baseline through optimized chunk retrieval, prompt refinement, and 4 testing cycles.
- Used NLP to extract query attributes and access MySQL data for structured campus query handling.

**Lucent: Kanban Task Manager** | Github
*React, Vite, JavaScript*

- Built a Kanban-style React task board with To Do, Doing, and Done columns, where users can add, move, and delete tasks.
- Managed task state with the useState hook and rendered columns and cards dynamically using map and filter.
- Handled input with controlled form fields and click handlers, and styled the layout for a clear, responsive user experience.
